

Beginning at 4:00 pm Wednesday (until 9:00 pm) and 7:45 am Thursday (until the pits open), vehicles containing teams' robots and equipment will be allowed to enter loading lane off of La Rue Road to unload. Team members will immediately unload all materials that will be taken into the event from the vehicle. Once the unloading is completed, the vehicle will be asked to move on so that additional vehicles may be allowed to enter the lane and unload. Team members will take their equipment and robots down the ramp to their pit to drop off. The team members will not be allowed to do any work on the pit or the robot (the robot shall remain bagged) until the pits officially open on Thursday morning. **Note: For the purposes of safety, no more than 4 or 5 vehicles will be allowed in the lane at any one time. If the lane is full, vehicles may be rerouted to Lot 30 to be staged. See parking locations document for Lot 30 location. Please have team members ready to unload when the vehicle arrives.**

**Load - in vehicle only egress** → **Robot and equipment egress** →
